

Rentelligence

The Marketplace of Intelligent Agents

WELCOME

Rentelligence.ai

Rentelligence is the world's first decentralised AI/ML marketplace where intelligent agents can be purchased, leased, or rented — unlocking limitless possibilities across industries, metaverse, and Web3 ecosystems.

Welcome to Rentelligence

At Rentelligence, we envision a future where intelligent agents seamlessly power every aspect of life and business — from automating DeFi strategies to transforming healthcare and agriculture.

FOUNDER'S STATEMENT

TEAM

At Rentelligence, our team of AI pioneers, blockchain engineers, and Web3 innovators is dedicated to pushing the boundaries of intelligent automation. Combining deep technical expertise with a passion for decentralized innovation, our experts design, develop, and optimize advanced AI agents that empower businesses and communities worldwide.

Driven by innovation. United by intelligence. Focused on your success.

AMELIA HART

CFO & CO FOUNDER

OLIVER KNIGHT

Cloud Architect / Dev Apps Engineer

FOUNDER'S STATEMENT

PROJECT LAUNCH ROADMAP

PRELAUNCH

October 2025

Initialising platform introduction with limited group of people, businesses and close circle .

GLOBAL LAUNCH

JANUARY 2026

Mega global launch with all platform native app and army of agents to choose from.

LAUNCH OF DETAILED METAVERSE NFT SIMULATOR

MARCH 2026

NFT ownership blockchain and metaverse simulation of agents in order to extend their training and monetisation.

GLOBAL INTRODUCTION OF MECHANICAL AGENTS

JANUARY 2027

When the world will be ready to receive sophisticated humanoids , autonomous agents we will initialise our sell/lease of mechanical assistance.

UNDERSTANDING

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

AI

AI means making machines smart so they can think, learn, and act like humans.

AI is the big idea, the brain (overall smartness).

AI uses ML to power things like Google Maps (fast routes), Netflix (movie suggestions), and Self-driving cars (safe driving decisions).

ML

ML is a part of AI where machines learn from data and improve on their own without being told step-by-step what to do.

ML is the tool inside it, the memory and practice (learning from data).

AI makes machines smart, ML teaches them with data, and together they help solve real problems.

Machine
Learning
Vs
Deep learning

UNDERSTANDING

ARTIFICIAL INTELLIGENCE SYSTEMS

1. Reactive Systems

These only react to situations. They don't remember past experiences.

2. Limited Memory Systems

These can use past data for a short time to make better decisions.

3. Theory of Mind Systems

AI that can understand emotions, beliefs, and intentions of humans.

4. Self-Aware Systems

AI that becomes conscious about itself like humans.

5. Expert Systems

AI that uses **rules + knowledge** to solve specific problems.

6. Machine Learning Systems

AI that learns from **data and patterns** instead of fixed rules.

7. Deep Learning Systems

A special kind of ML using **neural networks** (like mini human brains).

8. Natural Language Processing

AI that understands and works with **human language**.

9. Robotics Systems

AI inside robots that can **act in the real world**.

10. Computer Vision Systems

AI that sees and interprets images/videos.

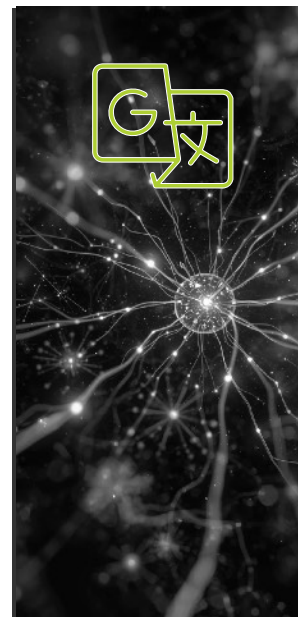

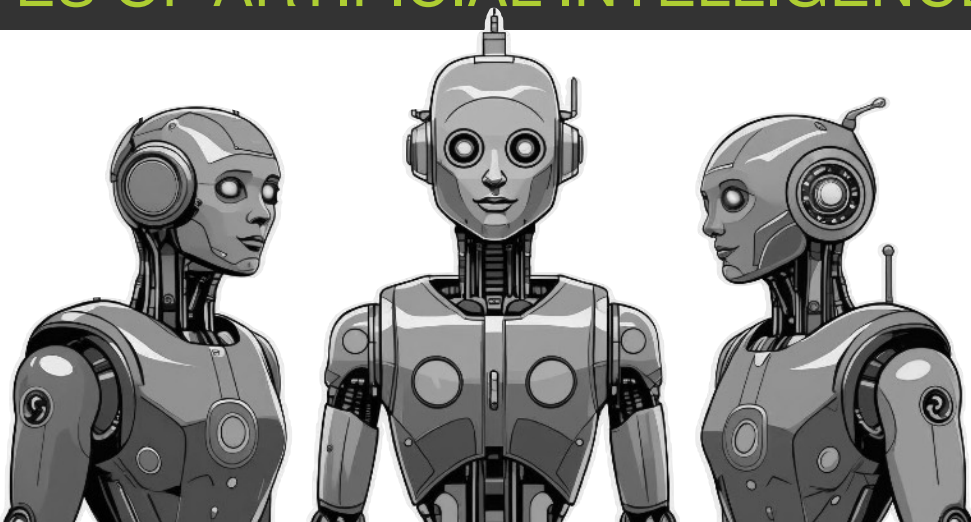

Rentelligence.ai

UNDERSTANDING TYPES OF ARTIFICIAL INTELLIGENCE

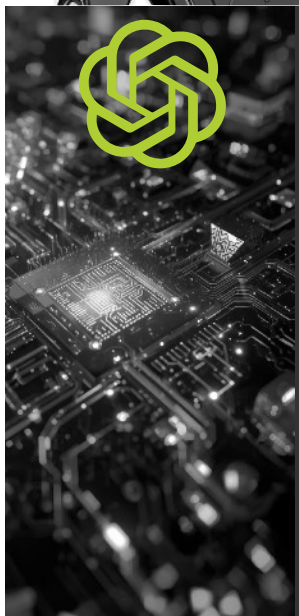

AGI (ARTIFICIAL GENERAL INTELLIGENCE)

- **Meaning:** AI that can **think, learn, and apply knowledge like humans** across many areas.
- **How smart:** As smart as an average human being. Can solve new problems without needing re-programming.
- **Examples:**
 - Still in research → doesn't exist yet.
 - Fiction examples: **Jarvis (Iron Man)**, **Data (Star Trek)**.
- **Human replacement:** Almost all intellectual jobs → teachers, engineers, doctors, lawyers, etc.

ASI (ARTIFICIAL SUPER INTELLIGENCE)

- **Meaning:** AI that goes **beyond human intelligence in every possible way** — creativity, emotions, reasoning, speed.
- **How smart:** Smarter than the **best human minds combined**.
- **Examples:**
 - Not real yet, only imagination/science fiction.
 - Example in fiction: **Skynet (Terminator)**.
- **Human replacement:** Could outperform humans in **every field** → science, arts, decision-making, even leadership.

ANI (ARTIFICIAL NARROW INTELLIGENCE)

- **Meaning:** AI built for **one specific task only**.
- **How smart:** Smarter than humans in that *one* area, but useless outside it.
- **Examples:**
 - Google Maps (navigation).
 - Netflix recommendations.
 - Siri/Alexa voice assistants.
- **Human replacement:** Specific jobs like customer support chat, spam detection, or route planning.

Type of Agent	Problem Area	Possible Human Replacement
Reactive	Simple decisions	Chess players, basic operators
Model-Based	Navigation, logistics	Drivers, dispatch planners
Goal-Based	Transportation, automation	Taxi/delivery drivers
Utility-Based	Optimization, finance	Travel agents, analysts
Learning	Knowledge, service	Teachers, support staff
Autonomous	Dangerous/exploration tasks	Soldiers, astronauts, miners

REACTIVE

React instantly; no memory, no learning.

AUTONOMOUS

Make decisions independently, even in unknown environments.

UNDERSTANDING

AGENTIC NATURE

RENTELLIGENCE BUSINESS MODEL

AI PLATFORM BUSINESS MODEL

INNOVATION

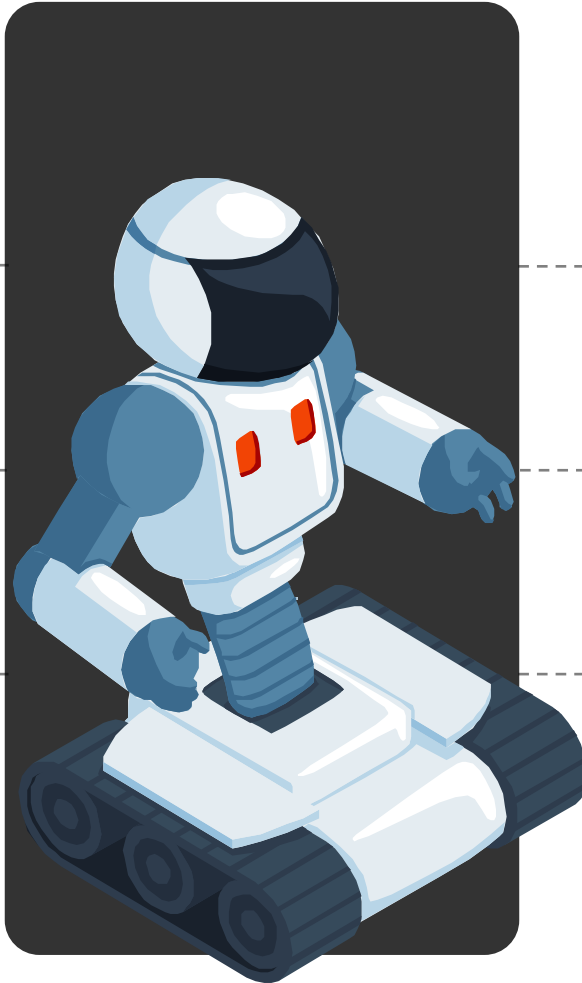

Agentic world is evolving and agents need to go public to serve and solve.

SCALABLE

A model as the technology grows model gets momentum.

SUSTAINABLE

Not dependent on any single model or technology or solution

ACCOMADATING

Only model that can accommodate lay man to ensure their participation

FUTURE CENTRIC

Future is in the hands of agents and these agents have long way to evolve.

ACCESSAIBLE

Transforming times are

LLM PLATFORMS

Companies that build base models, host APIs, license models, or sell on-prem deployments.

- OPEN AI - SAM ALTMAN - \$300-500B
- ANTHROPIC - DARIO AMODEI - \$183B
- DEEP SEEK - LIANG WENFENG - \$150B
- XAI - ELON MUSK - \$180B
- MISTRAL AI - ARTHUR MENSCH - \$14B

\$1TB

TARGET MARKET

\$—-B

SOFTWARE AI

\$487B

GLOBAL INFRA

\$782B

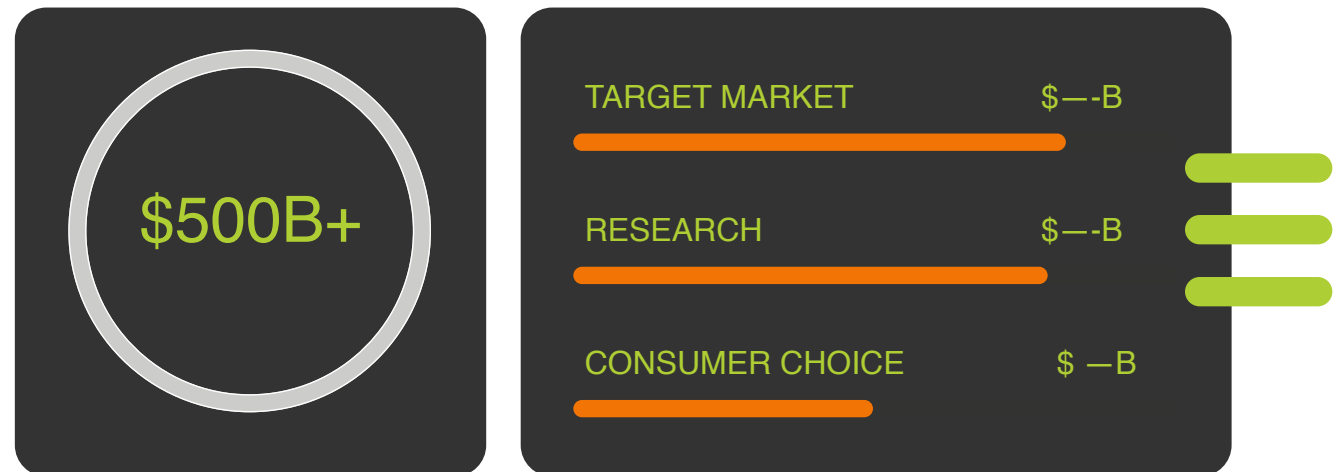

AI AGENTS & ASSISTANTS

Agents combine LLM reasoning + tool use, RAG, workflows.

- PERPLEXITY - ARVIND SRINIVAS
- CHARACTER - NOAM SHAZEER
- ADEPT / INFLECTION - DANIEL HULME

**CONSUMER AND
RESEARCH
ASSISTANCE**

“AI agents” market estimate example: ~\$62.2B by 2031 (KbvResearch) with high CAGRs; other reports fold agents into broader generative AI TAM.

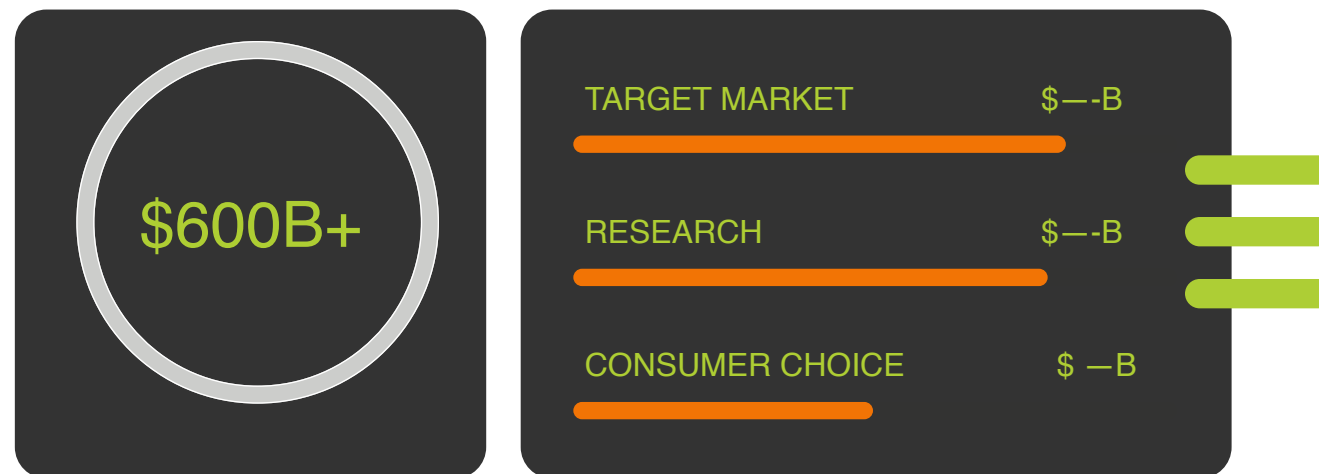

CONTENT CREATION

Agents combine LLM reasoning + tool use, RAG, workflows.

- RUNWAY - Cristóbal Valenzuela,
- STABILITY - Emad Mostaque
- SYNTHESIA - Victor Riparbelli
- ELEVEN LABS - Mati Staniszewski

**Gen-
creative
tools**

Many research houses estimate from ~\$70B–\$600B by 2030–2032 depending on scope (Grand View ~\$109B by 2030;

Search, RAG, and Enterprise Knowledge Platforms

Embedding + vector DBs + RAG pipelines

- HUGGING FACE - Clément Delangue
- GLEAN - Kevin Jiang
- WEAVIATE - founders vary

**Model & dataset
hub, inference
hosting**

Enterprise search / cognitive search + knowledge management market commonly modelled as part of enterprise software; estimates vary but enterprise AI software TAM in the hundreds of billions by 2030.

\$400B+

TARGET MARKET \$—-B

ENTERPRISE SEARCH \$—-B

COGNITIVE RESEARCH \$ —B

MLOps / Inference stacks / Data & Labeling / Synthetic data

Data ops, synthetic data, and MLOps

- SCALE AI - Alexandr Wang.
- LABELBOX - founders vary

DATA OPS , SYNTHETIC DATA & MLOPS

Data ops, synthetic data, and MLOps combined are large — many reports put data & MLOps segments into multi-\$10s of billions by 2030 as enterprises scale production ML. (Part of AI infra TAM).

Labelbox
scale

AI Infrastructure & Chips

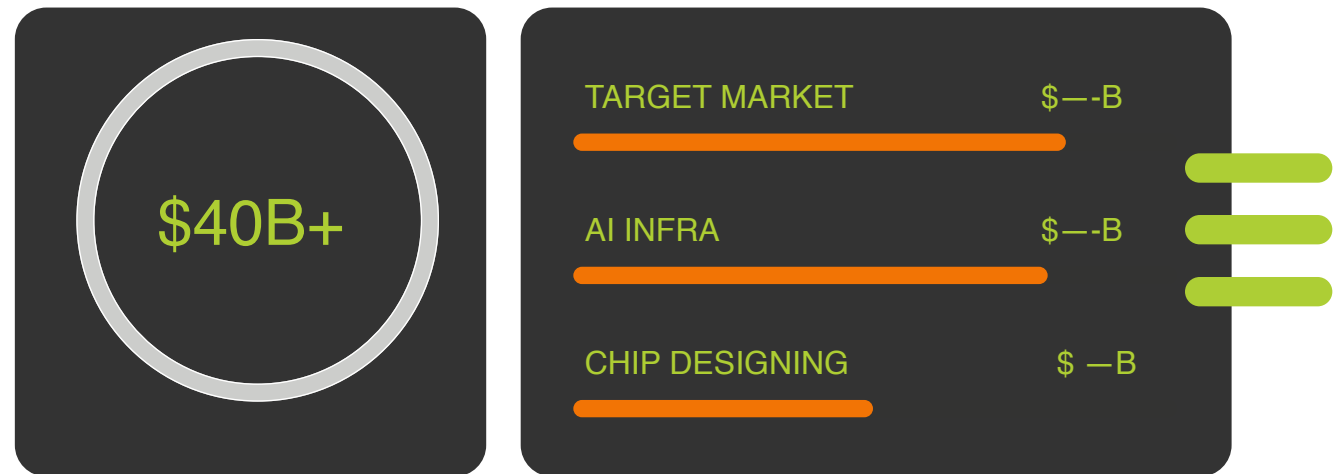

Data-center GPU / AI infrastructure

- NVIDIA & Groq, Cerebras, Tenstorrent.

AI INFRA AND CHIP DESIGNING

Data-center GPU / AI infrastructure market measured in hundreds of billions cumulative spend (Nvidia revenue growth and chip market expansion)

Robotics & Embodied AI

Humanoid / service robot market

- Unitree Robotics - Wang Xingxing
- Figure AI - Brett Adcock
- Covariant - Pieter Abbeel
- Agility Robotics - Apptronik, Tesla

Humanoid, Warehouse Robotics, Commercial Deployment

Humanoid / service robot market estimates vary: Grand View / MarketsandMarkets give humanoid robot market in the low-to-mid billions by 2030 (\$4B–\$15B depending on scope), while long-range forecasts (Morgan Stanley) put humanoids potentially in the trillions by 2050.

\$20B+

TARGET MARKET

\$—-B

AUTOMATION

\$—-B

COMMERCIAL DEPLOYMENT

\$ —B

Speech, Voice, Translation, & Dubbing

Speech recognition & voice services

- Deepgram, Rev, Descript

SPEECH AND VOICE RECOGNITION

Speech recognition & voice services form a multi-\$10s B market by 2030 inside broader conversational AI and contact center automation markets. (Estimates fold into CX automation and IVR markets.)

\$10B+

TARGET MARKET

\$—-B

SPEECH & VOICE

\$—-B

TRANSLATION , DUBBING

\$ —B

Vertical AI

(Healthcare, Finance, Legal, Sales, Education) — sector-specific AI SaaS

healthcare AI opportunity

Healthcare: Tempus, Babylon, Olive (automation) — founders vary.

Legal: Casetext (CoCounsel), Evisort — founders vary.

Sales / CX: Gong, Drift, Gong (founders listed publicly)

**Healthcare
spending; legal
tech, sales tech**

Vertical AI TAMs are large but segmented: e.g., healthcare AI opportunity (diagnostics, admin automation) often cited as hundreds of billions across healthcare spending; legal tech, sales tech are multi-\$10s B markets.

\$10B+

TARGET MARKET

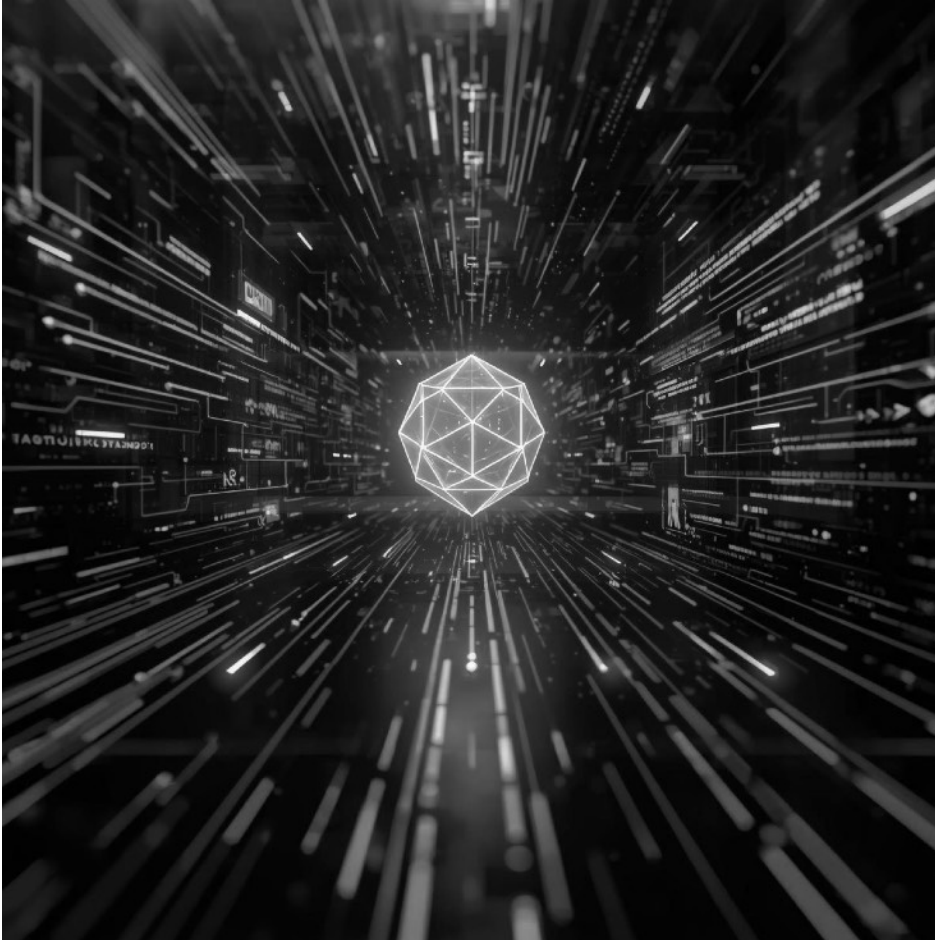

\$—-B

HEALTHCARE

\$—-B

LEGAL

\$ —B

Security / Trust & Safety / Detection (watermarking, deepfake detection)

Cybersecurity + AI security

- **Sensity (formerly Deeptrace), Hivemind**
(example companies) — founders vary.

Cybersecurity + AI security

Cybersecurity + AI security market is itself multi-\$10s of billions; AI-specific safety tooling is an emerging slice of that.

Let's Explore How you can participate?

Empowering the Future with AI Agents — Rent, Lease, Own, and Evolve

Monthly Rental (AiaaS)

Rentelligence is the world's first decentralized AI/ML marketplace where intelligent agents can be purchased, leased, or rented — unlocking limitless possibilities across industries, metaverse, and Web3 ecosystems.

Rentelligence.ai

7 WAYS TO EARN

Rentelligence has created a very easy ai agent leasing and renting model that enables your money work for you because in such a fast transforming times it is almost impossible to stay concurrent with the changes and technology therefore you sit and relax and Rentelligence auto Agent Deployment Program ensures your participation and rewards that matter.

1. RENTAL INCOME
2. AGENT CASCADE C
3. BOOSTER PROFIT
4. DYNAMIC REFERRAL
5. LEADERSHIP FLEET
6. PERFORMANCE INCOME
7. REVENUE CLUB

INFINITE EARNING POTENTIAL

PARTICIPATION

1

Own or Lease AI agents and deploy as Monthly AiaaS

Entrepreneurial

Agents for Small Enterprises

\$100  \$2000 (8% Monthly AiaaS upto 200%)

Business Pro

Agents for Businesses

\$2100  \$10000 (9% Monthly AiaaS upto 210%)

Industrial

\$11000  & Above (10% Monthly AiaaS upto 220%)

For the first time ever, a platform is empowering users to actively participate in the agentic evolution—at every stage. Whether you own or lease it, this platform enables you to accomplish tasks, build your digital presence, and even put it to work as a business asset that earns for you. It's not just technology—it's your gateway to staying relevant, productive, and prosperous in the AI-driven future.

AGENTIC CASCADE COMMISSION

2.

AN ARMY OF AGENTS CAN WORK FOR YOU

If you own or lease an agent/s and while enjoying the freedom with Rentelligence through agent Deployment Program, you can also just share about your breakthrough rewards with your near & dears , every successful lease or sell will accelerate your financial flow.

20
LEVELS

Deep and solid
hierarchy that turns
you into a full fledged
commune that works
for mutual welfare

DOUBLE YOUR RENTAL YIELD

3. BOOSTER PROFIT PROTOCOL

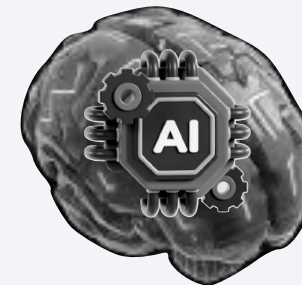

- BPP JUST DOUBLES YOUR RENTAL YIELD AND SHORTENS YOUR LEASE PERIOD.
- TO ENABLE BPP ALL YOU HAVE TO LEASE OR SELL 3 AGENTS OF EQUIVALENT OR ABOVE VALUE OF YOUR OWN AGENT.
- BPP CAN ONLY BE ENABLED WITHIN 7 DAYS OF YOUR FIRST AGENT LEASE OR PURCHASE

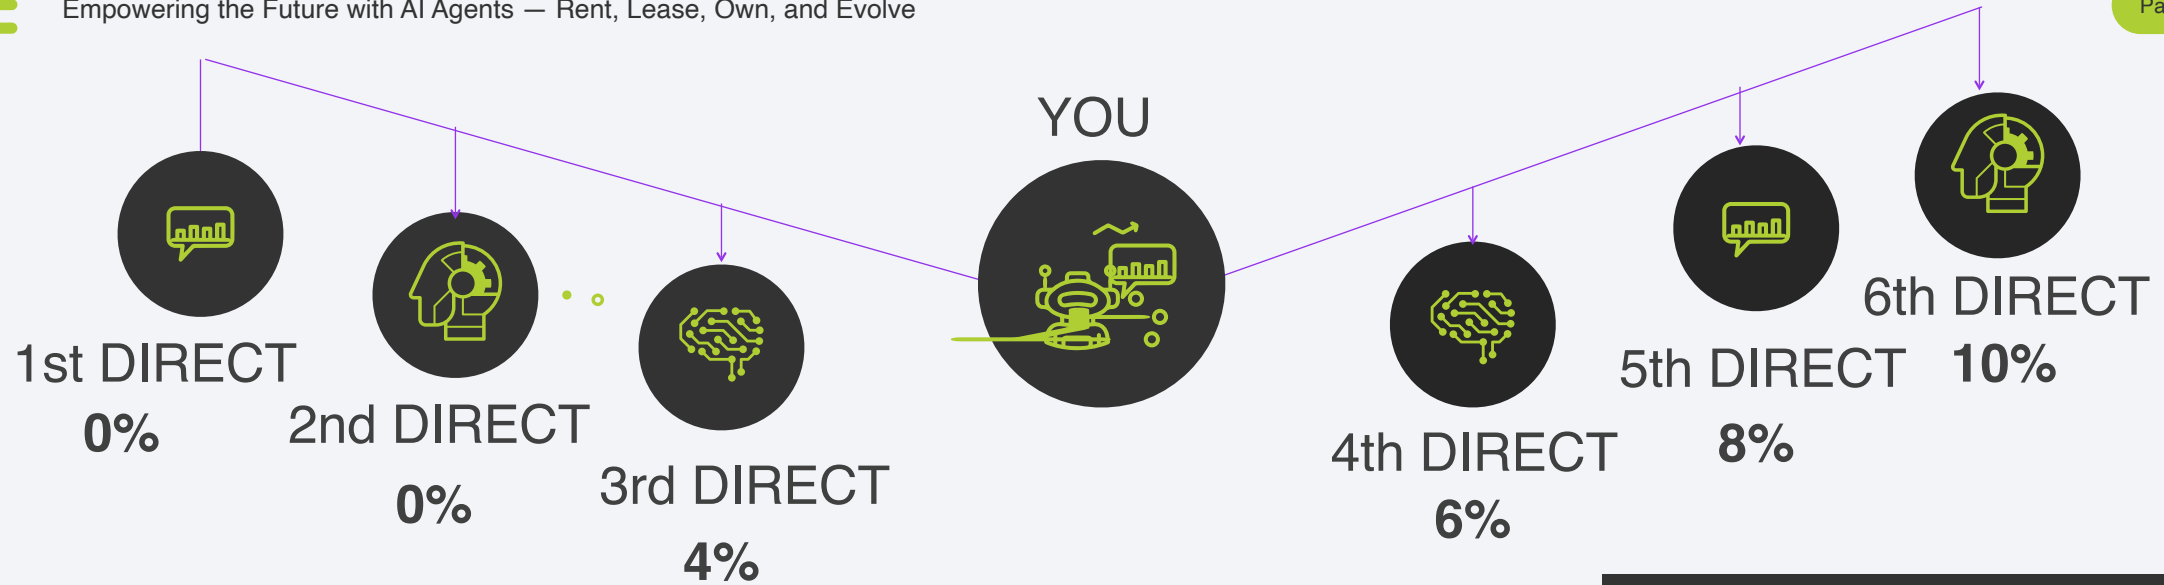

BEFORE BOOSTER

WITH BOOSTER

8% / 9% / 10%

16% / 18% / 20%

DRY ALLOWS YOU TO EARN FROM YOUR TEAM INCOME THAT SAYS A PERCENTAGE OF THEIR ACTIVE INCOME SHALL BE SHARED TO YOU IF YOU QUALIFY ;

- 3 Directs unlocks 4% of their active income
- 4 Directs unlocks 6% of their active income
- 5 Directs unlocks 8% of their active Income
- 6 Directs onwards you earn 10% of your team .

DOUBLE YOUR RENTAL YIELD

4. DYNAMIC REFERRAL YIELD

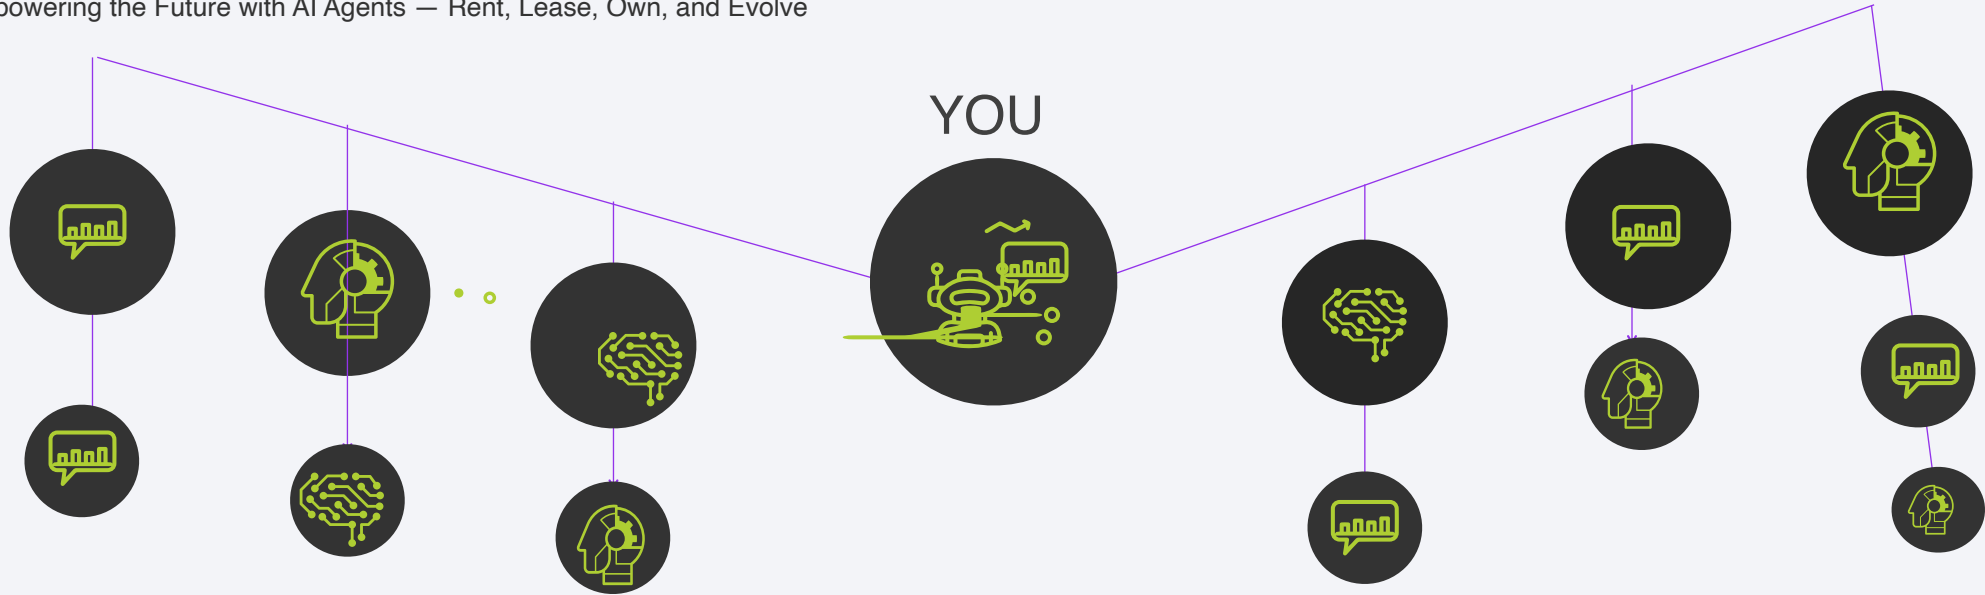

BEFORE DRY
